

Technical Documentation

System Architecture Overview

This document contains technical diagrams and images to demonstrate the system architecture. Below is the main system diagram showing the key components and their interactions.

Figure 1: System Architecture Diagram

The diagram shows the main components of the system.

Component Details

Each component in the system has specific responsibilities:

- Load Balancer: Distributes incoming traffic
- Application Servers: Process business logic
- Database: Stores persistent data
- Cache Layer: Improves performance
